

Fire Safety Education Programs

Seattle Fire Department Fire Prevention Division

Learn fire safety!

Grades K-8

Easily integrate fire and life safety messages in the classroom by ordering a free, activity workbook and/or check out our action packed safety suitcase.

Solidify safety knowledge and behaviors with a fire station tour or firefighter school visit. Students will learn firsthand how firefighters work to keep our city safe. Groups of 25 or less may request a local fire station tour. Groups of 15 or more may request a firefighter visit at the school.

Learn fire science!

Grades 6-8

Seattle Fire Department educators present a curriculum challenging student knowledge of fire science by comparing videos of real fire with excerpts of fire portrayed in popular media. Based on what real fire is like, students develop their own home fire escape plan, learn ways to prevent fire at home and how to make fire safe choices. Choose one or more units to include in your classroom.

Curriculum aligns with current Health & Fitness EALRs and GLEs.

Fire Stoppers Program

Whenever a fire occurs at school, no matter how small, the Seattle Fire Department must be notified. If a student is involved, school policy requires that a referral be made to the Fire Stoppers Firesetting Intervention Program. Fire Stoppers educates children and provides families with resources and tools to stay safe. Referral forms are available by calling (206) 386-1338 or emailing fireinfo@seattle.gov.

Sign up for safety programs and order materials at www.seattle.gov/fire/pubEd.
